SUMMARY

B.Tech CSE (AI & ML) student experienced in building end-to-end Machine Learning systems in Python and Scikit-learn on real-world datasets. Shipped deployed ML platforms across crop-yield prediction, computer vision disease detection, RAG chatbots, and customer intelligence. Skilled in Predictive Modeling, Feature Engineering, and Data Analysis, with 400+ DSA problems solved.

TECHNICAL SKILLS

Languages: Python, Java, SQL

CS Fundamentals: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Machine Learning: Supervised Learning (Regression, Classification, Random Forest, XGBoost) & Unsupervised Learning (Clustering - K-Means); Feature Engineering, Model Evaluation, Predictive Modeling

AI & Deep Learning: Deep Learning, Computer Vision (MobileNetV3, TensorFlow Lite), Natural Language Processing (NLP), Generative AI & LLMs (RAG, Llama 3.3), Vector Databases (Pinecone)

Data Analytics & BI: Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning, Data Visualization, Business Intelligence, Customer Segmentation, Cohort Analysis & Churn Analysis

Libraries/Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, Flask, REST APIs

Databases & Tools: MySQL, Power BI, Tableau, Excel, Git, GitHub, Gunicorn, Render, Jupyter Notebook, Amazon SageMaker

EXPERIENCE

AI/ML Intern | MyLotic Group (Remote)

Aug 2026 - Present

- Building AI/ML-driven features and data pipelines for an enterprise SaaS platform, applying machine learning to automate and enhance core business workflows.
- Collaborating remotely with the engineering team on backend development and REST API integration, connecting data processing pipelines with ML model integration to power the platform's predictive features.

PROJECTS

CustomerIQ - Customer Intelligence Platform | [Live Demo](#) | [GitHub](#)

Apr 2026 - Jun 2026

- Built an end-to-end ML pipeline on 541K UCI Online Retail transactions using Scikit-learn, segmenting customers via K-Means on Recency, Frequency, and Monetary (RFM) features to reveal 26% of customers drive 80% of revenue.
- Trained a Random Forest churn classifier reaching 71% accuracy (F1 score of 0.53) that outperformed Logistic Regression, flagging 33% of customers as at-risk.
- Modeled Customer Lifetime Value with a Random Forest regressor (R^2 score of 0.91), deployed as a Flask and Gunicorn dashboard with Chart.js and REST APIs on Render.
- Automated cohort and Pareto analysis to surface retention trends, identifying that high-frequency buyers spend 7.2x more than occasional buyers.

SmartHarvest.ai - AI Platform for Indian Agriculture | [Live Demo](#) | [GitHub](#)

Nov 2025 - Mar 2026

- Engineered an XGBoost crop-yield regression pipeline on 19,689 records with a time-based split, achieving a test R^2 score of 82.68% while excluding Production to eliminate target leakage.
- Designed a plant-disease image classifier (MobileNetV3Small on TensorFlow Lite) reaching 81.58% accuracy and 81.62% weighted F1 score across 4,127 images spanning 15 crop-leaf classes.
- Implemented a Retrieval-Augmented Generation (RAG) farming chatbot using MiniLM embeddings, Pinecone vector search, and Llama 3.3 to deliver context-grounded agronomic guidance.
- Deployed the platform as a Flask and Gunicorn web application exposing 5 REST API endpoints, integrating live Open-Meteo rainfall data for real-time predictions.

EDUCATION

Bachelor of Technology - CSE (AI & ML) | IMS Engineering College, AKTU

2023 - 2027

Intermediate & High School | Priyanka Modern School, CBSE

2021 - 2023

CERTIFICATIONS

- Oracle Agentic AI Certified Foundations Associate — Aug 2026
- AWS Academy Machine Learning for NLP — Jun 2026
- Deloitte Data Analytics Job Simulation — Mar 2026
- Google Advanced Data Analytics Professional Certificate — Feb 2026

ACHIEVEMENTS

- Solved 400+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks, demonstrating strong computational thinking.
- Launched 4 production-grade Machine Learning applications live on Render, spanning agriculture and customer analytics domains.
- Earned 4 industry certifications from Google, AWS, and Deloitte in Data Analytics, Machine Learning, and Generative AI.
