SUMMARY

B.Tech CSE (AI & ML) student with a strong foundation in SQL and Python, and hands-on experience building end-to-end data pipelines for machine learning systems on real-world datasets. Comfortable with data cleaning, ETL-style feature engineering, data modeling, and database-backed application development (MySQL). Deployed multiple production data platforms using Python, Flask, and REST APIs, with exposure to cloud platforms (AWS SageMaker) and version control (Git). 400+ DSA problems solved.

TECHNICAL SKILLS

Languages & Databases: Python, SQL (MySQL, PostgreSQL), Java, Neon (Serverless Postgres), Database Management Systems (DBMS)

Data Engineering: ETL-style Data Pipelines, Data Cleaning, Data Modeling, Normalization & Schema Design

Machine Learning & Analytics: Supervised & Unsupervised Learning, Regression, Classification, Clustering (K-Means), XGBoost, Random Forest, Feature Engineering, Predictive Modeling, Exploratory Data Analysis (EDA), Statistical Analysis, Customer Segmentation, Cohort & Churn Analysis

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, Flask, REST APIs

Tools & Platforms: Git, GitHub, Amazon SageMaker (AWS Cloud), Power BI, Tableau, Excel, Gunicorn, Render, Jupyter Notebook

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems, Computer Networks

EXPERIENCE

AI/ML Intern | MyLotic Group (Remote)

Aug 2026 – Present

- Working on the HRMS (Human Resource Management System) project, building AI/ML-driven features and data pipelines to automate and enhance HR workflows.
- Collaborating remotely with the engineering team on data processing, model integration, and feature development for the platform.
- Designing and managing the PostgreSQL database (Neon serverless Postgres) for the platform, including schema design and query optimization for HR data workflows.

PROJECTS

CustomerIQ – Customer Intelligence Platform

Apr 2026 – Jun 2026

[Live Demo](#) | [GitHub](#)

- Built an end-to-end data pipeline on 541K UCI Online Retail transactions — extracting, cleaning, and transforming raw transactional data with Pandas for downstream analysis.
- Segmented customers via K-Means on engineered RFM features (26% of customers drive 80% of revenue); trained a Random Forest churn classifier (71% accuracy) and a CLV regressor (R^2 0.91), deployed via Flask/Gunicorn REST APIs on Render.
- Automated cohort and Pareto analysis pipelines to surface retention trends (high-frequency buyers spend 7.2x more than occasional buyers).

SmartHarvest.ai – AI Platform for Indian Agriculture

Nov 2025 – Mar 2026

[Live Demo](#) | [GitHub](#)

- Engineered an XGBoost crop-yield regression pipeline (test R^2 82.68%) and a plant-disease image classification pipeline (MobileNetV3Small on TensorFlow Lite, 81.58% accuracy across 4,127 images, 15 crop-leaf classes).
- Deployed the platform as a Flask/Gunicorn web app exposing 5 REST API endpoints, integrating live Open-Meteo rainfall data for real-time predictions.

EDUCATION

Bachelor of Technology – CSE (AI & ML), IMS Engineering College, AKTU

2023 – 2027

Intermediate & High School, Priyanka Modern School, CBSE

2021 – 2023

CERTIFICATIONS

- Oracle Certified Foundations Associate — Agentic AI — Aug 2026
- AWS Academy Machine Learning Foundations — Jun 2026
- AWS Academy Machine Learning for NLP — Jun 2026
- Google Advanced Data Analytics Professional Certificate — Feb 2026

ACHIEVEMENTS

- Solved 400+ DSA problems across LeetCode and GeeksforGeeks; launched 4 production-grade data/ML applications live on Render, spanning end-to-end pipelines from raw data ingestion to deployed REST APIs.
